

# THE IMPROVED CEREAL HEAD TIMING FUNGICIDE.

- Helps improve yield and protects quality
- Best-in-class fusarium head blight (FHB) efficacy to drive improved quality management
- Sphaerex® fungicide provides management of leaf diseases in wheat, barley and oats
- Flexible use pattern for a diversity of situations

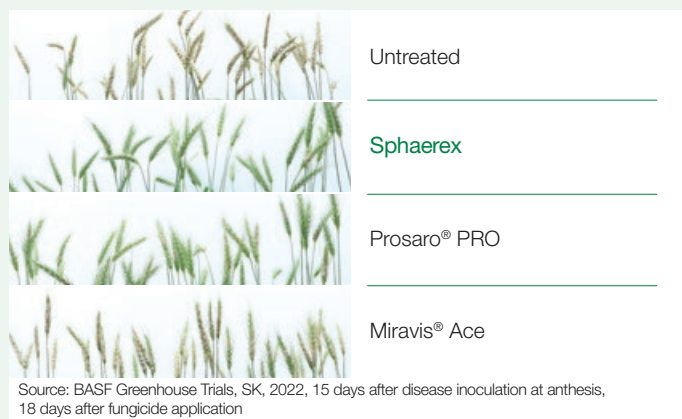

# Yield, quality and profitability that's undeniable.

## Higher yield potential with Sphaerex on wheat

## Increased efficacy on FHB.

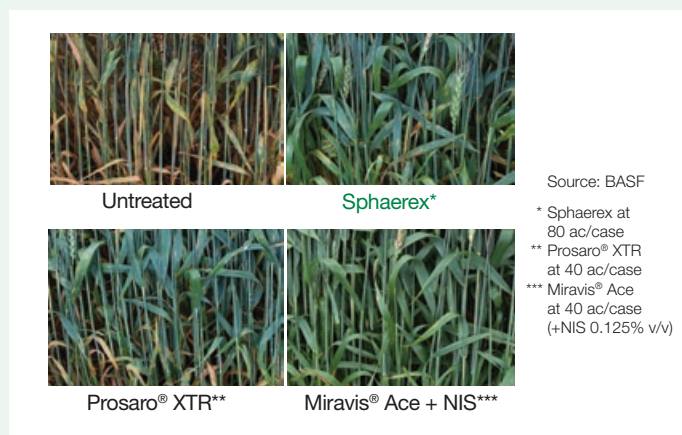

## Quality impacts your bottom line.

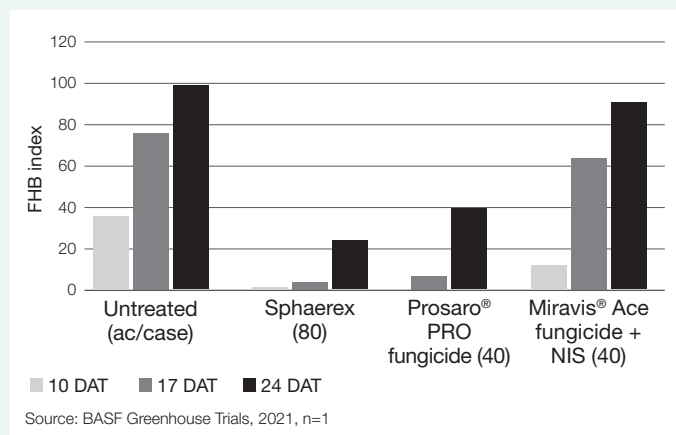

Grade impact	#1 – #2	#1 – #3
Price spread <sup>1</sup>	\$0.30/bu	\$0.86/bu
Impact per acre <sup>2</sup> (Based on yield of 55 bu/ac)	-\$16.50/acre	-\$47.40/acre

<sup>1</sup> Wheat Market Outlook and Price Report: November 20, 2023.  
<sup>2</sup> Impact per acre based off price spread and average yield of 55 bu/ac (StatCan, 2020 spring wheat yield).

## Improved management of foliar diseases.

## Best-in-class FHB management
