Cantus fungicide technology sheet

Proven protection against alternaria, botrytis and other key diseases in a wide range of crops.

- Rapidly rainfast to ensure long-lasting control under adverse conditions
- Protects against multiple fungal life stages, from initial infection to the spread of disease

	Crops	Diseases controlled
	Berries	Botrytis gray mold (Botrytis cinerea)
	Bulb vegetables	Alternaria purple blotch (<i>Alternaria porri</i>) Botrytis leaf blight (<i>Botrytis squamosa</i>)
	Carrots	Alternaria leaf blight (Alternaria dauci)
	Cucurbit vegetables	Alternaria blight (<i>Alternaria cucumerina</i>) Gummy stem blight (<i>Didymella bryoniae</i>)
	Lettuce (field)	Botrytis rot (<i>Botrytis cinerea</i>) Lettuce drop (<i>Sclerotinia minor</i>) – suppression
	Fruiting vegetables	Botrytis gray mold (<i>Botrytis cinerea</i>) Early blight (<i>Alternaria solani</i>)
	Grapes	Powdery mildew (Uncinula necator)
	Potatoes	Early blight (Alternaria solani)
	Stone fruit	Brown rot (<i>Monilinia</i> spp.) Monilinia blossom blight (<i>Monilinia</i> spp.)
	Strawberries	Botrytis gray mold (Botrytis cinerea)

Timing

Refer to label for crop specific timing.

During periods of high disease pressure, use a shorter interval.

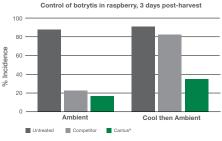

Formulation Wettable granules

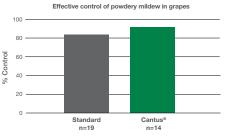

One case contains 4 x 2.83 kg jugs

Storage

Store in cool, dry, ventilated area without floor drain.

4 applications made between 10% bloom and fruit set Source: AAFC, Agassiz, BC, 2002

Source: BASF and university trials, 1997-2000

Application rates

One jug of Cantus treats 5 to 16.2 ha (12.3 to 40 acres).

Refer to label for crop specific rates and restrictions.

During periods of rapid growth or high disease pressure, use the higher rate.

Mixing order

- 1. Ensure the spray tank is clean before use.
- 2. Fill the tank 1/2 full of water and start agitation.
- 3. Add the required amount of Cantus fungicide to the tank.
- 4. Continue agitation while filling the remainder of the spray tank.
- 5. After use, clean the spray tank according to label precautions.

Application tips

Rainfastness – 1 hour.

Restricted entry interval – 12 hours.

Resistance management – Do not make more than two (2) sequential applications before alternating to a labeled fungicide with a different mode of action.

Pre-harvest interval

0 days for berries, carrots, cucurbits, fruiting vegetables, strawberries and stone fruit.

7 days for bulb vegetables.

14 days for field lettuce (head and leaf) and grapes.

30 days for potatoes.

Tank mixes

None on label.
