

Cantus fungicide

technology sheet

berries

Proven, preventative protection against botrytis gray mold in berries.

- Rapidly rainfast to ensure long-lasting control under adverse conditions
- Locally systemic to protect treated areas, even as they expand
- Protects against multiple fungal life stages, from initial infection to the spread of disease

Active ingredient

Boscalid – Group 7

Formulation

Wettable granules

One case contains

4 x 2.83 kg jugs

Storage

Store in cool, dry, ventilated area without floor drain.

Crop

Berries

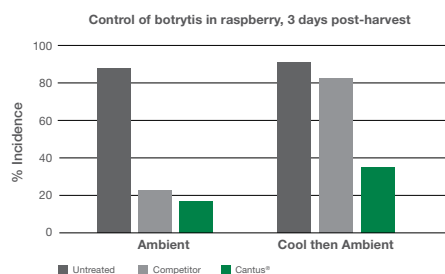

Timing

Early bloom, prior to onset of disease on a 7 to 14 day interval

During periods of high disease pressure, use a shorter interval.

Disease controlled

Botrytis gray mold (*Botrytis cinerea*)

4 applications made between 10% bloom and fruit set
Source: AAFC, Agassiz, BC, 2002

Application rates

One jug of Cantus fungicide treats 5.05 ha (12.5 acres).

Berries 560 g/ha (227 g/ac)

Mixing order

1. Ensure the spray tank is clean before use.
 2. Fill the tank 1/2 full of water and start agitation.
 3. Add the required amount of Cantus fungicide to the tank.
 4. Continue agitation while filling the remainder of the spray tank.
 5. After use, clean the spray tank according to label precautions.
-

Application tips

Rainfastness – 1 hour.

Restricted entry interval – 12 hours.

Resistance management – Do not make more than two (2) sequential applications before alternating to a labeled fungicide with a different mode of action.

Pre-harvest interval

0 days for berries.

Tank mixes

None on label.
