# Cantus fungicide technology sheet

### Proven, preventative protection against powdery mildew in grapes.

- Rapidly rainfast to ensure long-lasting control under adverse conditions
- Locally systemic to protect treated areas, even as they expand
- Protects against multiple fungal life stages, from initial infection to the spread of disease

#### **Active ingredient**

Boscalid – Group 7

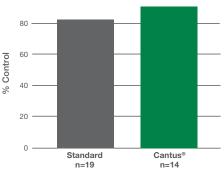

**Formulation** Wettable granules

**One case contains** 4 x 2.83 kg jugs

#### Storage

Store in cool, dry, ventilated area without floor drain.

Effective control of powdery mildew in grapes

Source: BASF and university trials, 1997-2000

# Crop

Grapes

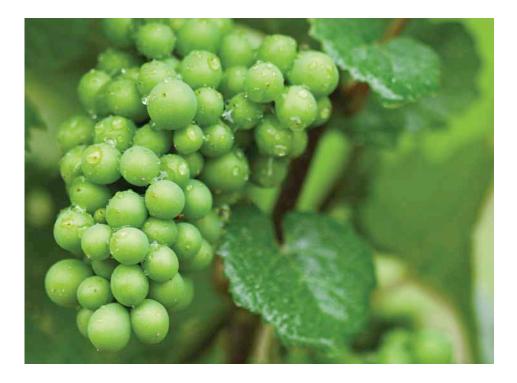

## Timing

At budbreak on a 10 to 14 day interval

During periods of high disease pressure, use a shorter interval.

#### Disease controlled

Powdery mildew (Uncinula necator)

#### **Application rates**

#### One jug of Cantus treats 9.0 ha (22.2 acres).

Grapes

315 g/ha (127 g/ac)

antus

Fungicide

#### Mixing order

- 1. Ensure the spray tank is clean before use.
- 2. Fill the tank 1/2 full of water and start agitation.
- 3. Add the required amount of Cantus fungicide to the tank.
- 4. Continue agitation while filling the remainder of the spray tank.
- 5. After use, clean the spray tank according to label precautions.

#### **Application tips**

Rainfastness - 1 hour.

**Restricted entry interval** – 12 hours.

**Resistance management** – Do not apply more than two (2) sequential applications before switching to another mode of action for at least two (2) sprays.

#### **Pre-harvest interval**

14 days for grapes.

#### Tank mixes

None on label.
