Sercadis fungicide technology sheet

Innovative, new chemistry for consistent, continuous control of powdery mildew.

- Control of powdery mildew in grapes
- Tank-mix and rotational flexibility to adapt to the season's needs
- Highly systemic activity helps protect new growth

Active ingredient Fluxapyroxad – Group 7

Formulation Suspension

One case contains 2 x 1.35 L jugs

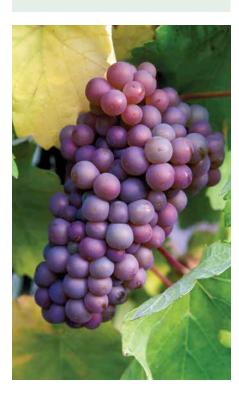

Storage Store away from food or feed.

Crop

Grapes

Timing

Begin prior to onset of disease on a 7 to 14 day interval

Disease controlled In grapes. Powdery mildew (*Erisyphe necator*)

Application rates

One jug of Sercadis[®] fungicide treats 5.4 ha (13.5 acres).

Grapes

Powdery mildew

250 ml/ha (100 ml/ac)

Mixing order

- 1. Ensure the spray tank is clean before use.
- 2. Fill the tank 1/2 full of water and start agitation.
- 3. Add the required amount of Sercadis fungicide to the tank.
- 4. Add the required amount of tank mix partner, if applicable.
- 5. Continue agitation while filling the remainder of the spray tank.
- 6. After use, clean the spray tank according to label precautions.

Application tips

Rainfastness - 1 hour.

Restricted entry interval – 12 hours.

Resistance management – Tank-mix with a non-Group 7 fungicide when such use is permitted. Avoid consecutive applications of Sercadis or other Group 7 fungicides in a season.

Pre-harvest interval

14 days for grapes.

Tank mixes

None on label.

Contact AgSolutions® Customer Care or your BASF Sales Representative for information on supported tank mixes.
