

BASF Crop Protection Product Storage Guidelines For Hort Crops - EAST 2024

Requires Heated Storage

Fungicides	Herbicides	Insecticides and Miticides
Cevya®	Ignite®	
Forum®	Prowl® H2O	Cimegra®
Headline® EC	Zidua® SC	Nealta®
Merivon®		Titan®
Sercadis®		
Serifel®		
Veltyma®		
Vivando®		
Zampro®		

The products listed above need to be protected from freezing. Heated storage and handling requires storing the product in a cool, dry, ventilated area. They should be separated from feed or foodstuffs, and **temperature should be maintained generally between 5°C to 20°C**. For individual products, please call your BASF **AgSolutions®** Horticulture Representative or **AgSolutions** Customer Care for more specific storage requirements.

Does NOT Require Heated Storage

Fungicides	Herbicides	Plant Growth Regulator
Cantus®	Frontier® Max	Apogee®
Kumulus® DF	Poast® Ultra	
Pristine®		

Insecticide
Versys®
Sefina®

Liquid products don't always work as intended if they freeze. For some liquid products, it will be required to thaw them out entirely and thoroughly mix or shake them. This does not, however, guarantee proper functionality, performance or efficacy of the product, even if they do not indicate heated storage on the MSDS or product label. If you have access to heated storage, it's best to avoid freezing all remaining inventory of liquid crop protection products when possible.

Always read and follow label directions.

AgSolutions, APOGEE, CANTUS, CEVYA, CIMEGRA, FORUM, FRONTIER, HEADLINE, IGNITE, KUMULUS, MERIVON, NEALTA, POAST, PRISTINE, PROWL, SEFINA, SERCADIS, SERIFEL, TITAN, VELTYMA, VERSYS, VIVANDO, ZAMPRO and ZIDUA are registered trademarks of BASF; all used under license by BASF Canada Inc. CANTUS, CEVYA, FORUM, HEADLINE, KUMULUS DF, MERIVON, PRISTINE, SERCADIS, SERIFEL, VELTYMA, VIVANDO and/or ZAMPRO fungicides should be used in a preventative disease control program. © 2024 BASF Canada Inc.
