

INVIGOR HYBRID CANOLA InVigor Health L359HPC

A hybrid with healthy yields.

A 300 series InVigor® canola hybrid that offers an enhanced oil profile that meets the health and functionality requirements of today's consumer. InVigor Health L359HPC offers great standability, our patented Pod Shatter Reduction technology and first-generation clubroot resistance.

	Yield	106.9% of the checks (InVigor L255PC and Pioneer® 45H33) in 2021 BASF internal trials 102.3% of InVigor L258HPC (n=11, 2021)
	Traits	Patented Pod Shatter Reduction technology First-generation clubroot resistance ¹ Specialty oil
	Growing zones	Mid to long
	Standability	Very strong
	Maturity	2 days later than InVigor Health L258HPC
	Blackleg	R – Blackleg resistant

Please note: Maturity and standability are based on performance ratings and data compiled from several InVigor internal trials over multiple years. Results may vary on your farm due to environmental factors and preferred management practices.

¹ To predominant clubroot pathotypes identified in Canada at the time of their registration.

The Pod Shatter Reduction advantage.

The patented Pod Shatter Reduction technology of InVigor continues to revolutionize the way canola growers approach their entire season. With InVigor Health L359HPC, growers have increased harvest flexibility with the option to straight cut or delay swath without sacrificing yield potential. Other advantages include:

- Helps protect your yield
- Reduces harvest loss, including from late fall harvests and overwintered canola
- Minimize the impact of late-season wind, hail and snow
- Longer pod fill resulting in larger seeds and maximizing yield
- Reduces volunteer canola

Always read and follow label directions.
