

TWO POWERFUL HERBICIDES FOR ENLIST E3™ SOYBEANS.

Enlist E3™ soybeans are resistant to a combination of three modes of action including 2,4-D, glyphosate and glufosinate. Liberty® 200 SN herbicide (glufosinate) and Enlist™ 1 herbicide together give farmers the best control of tough and resistant weeds.

Why use Liberty 200 SN herbicide in your Enlist E3™ soybeans?

- **Improved weed control** on tough-to-control weeds including glyphosate resistant biotypes and better performance on winter annual and perennial weeds
- **Broader spectrum control** of broadleaf and grass weeds with a tank mix of Liberty 200 SN and Enlist™ 1 herbicides
- **Application flexibility** with Liberty 200 SN and Enlist™ 1 applied sequentially or in a tank mix to provide two modes of action to control weeds including resistant weeds

Fast activity of emerged weeds in Enlist E3™ soybeans.

UNTREATED

ZIDUA® SC HERBICIDE + GLYPHOSATE
FOLLOWED BY LIBERTY 200 SN

S.T.O.P. weeds with Liberty 200 SN guidelines.

- S.** **Start clean & stay clean.** Control weeds prior to planting with other herbicide modes of action and continue to monitor and manage escapes throughout the season.
- T.** **Target weeds < 3".** Smaller weeds are easier to control with fewer growing points.
- O.** **Optimize coverage.** Follow the correct rate, water volume (recommendation of 20 gal/ac) and nozzle recommendation for optimum droplet size (medium to coarse).
- P.** **Pair with residuals.** Use multiple, effective modes of action with pre-emergence and post-emergence residual herbicides.

Get the most from Liberty 200 SN.

- Liberty 200 SN works best when applied on warm, sunny days with middle of the day application (9am to 6pm) providing better results.
- Ammonium sulfate is recommended and should be added before Liberty 200 SN and/or the tank mix partner.

Improved weed control of broadleaf and grass weeds in Enlist E3™ soybeans.

Liberty 200 SN + Enlist™ 1

Source: BASF Small Plot Trials, Belmont, ON, 2022

Recommendations for Enlist E3™ soybeans.

- Use multiple effective modes of action to help prevent resistance.
- Use residual herbicides pre-emergence and post-emergence for residual control until canopy closure.

PRE-EMERGENCE

Integrity®¹ or Zidua SC

POST-EMERGENCE

Liberty 200 SN + Enlist™ 1
+/- Zidua SC

¹ In a tank mix with glyphosate and Merge® adjuvant.
