

Select herbicide

technology sheet

Post-emergent control of the toughest grassy weeds in canola, dry beans, field peas, potatoes, seedling alfalfa and soybeans.

- Wide window of application
- Tank-mix flexibility for enhanced weed control
- No follow-crop restrictions
- Complements Liberty® 200 SN herbicide for enhanced control of grassy weeds

Active ingredient

Clethodim – Group 1

Formulation

Emulsifiable concentrate

One case contains

3 L of Select® herbicide

9 L of Amigo® adjuvant

Storage

Heated storage not required.

Not affected by freezing.

Crops

Canola

Dry beans

Field peas

Potatoes

Seedling alfalfa

Soybeans

Staging¹

cotyledon up to early bolting

post-emergence

Weeds controlled

Grasses

Annual bluegrass²

Barnyard grass

Crabgrass (large, smooth)

Fall panicum

Foxtail (green, yellow)

Old witchgrass

Persian darnel

Proso millet

Quackgrass³

Volunteer canary grass

Volunteer cereals (barley, oats, wheat)

Volunteer corn

Wild oats

Staging

2 to 6 leaf

¹ See label for specific crop applications.

² Suppressed at 154 ml/ac (380 ml/ha).

³ Apply at 154 ml/ac (380 ml/ac) for control.

We create chemistry

Application rates

One case of Select will treat 20 to 60 acres, depending on rate.

Canola	77 to 154 ml/ac (190 to 380 ml/ha)
When tank mixed with Liberty 200 SN	25 ml/ac (63 ml/ha) ⁴
Dry beans	77 ml/ac (190 ml/ha)
Field peas, potatoes, seedling alfalfa, soybeans	77 to 154 ml/ac (190 to 380 ml/ha)

All applications

Amigo	0.5 to 1% v/v (5 to 10 L per 1000 L of water)
-------	---

Water volume

Ground application ⁵	57 L/ac (15 gal/ac) minimum
---------------------------------	-----------------------------

Mixing order

1. Ensure the spray tank is clean before use.
2. Fill clean spray tank 1/2 full of water and start agitation.
3. Add the required amount of Select. Continue to agitate.
4. Add the correct amount of Amigo adjuvant while continuing agitation.
5. Continue agitation while adding the remaining amount of water.⁶

If tank mixing with Liberty 200 SN herbicide: add AMS, then add Amigo⁷ followed by Liberty 200 SN, agitate moderately, finally add Select, in sequential order.

Application tips

Rainfastness – 1 hour.⁸

Pre-harvest interval

30 days after application for seedling alfalfa.

60 days after application for canola, dry beans and potatoes.

75 days after application for field peas and soybeans.

Tank mixes⁹

Herbicide for LibertyLink[®] canola: Liberty 200 SN

Contact **AgSolutions[®]** Customer Care or your local BASF **AgSolutions** Retail Representative for additional information on supported tank mixes.

⁴ For LibertyLink canola only.

⁵ For tank mixing, follow recommendations of tank-mix partners.

⁶ Agitate moderately, as over-agitation may cause foaming.

⁷ Merge[®] adjuvant can be used in place of Amigo. The two adjuvants cannot be mixed together.

⁸ Rainfastness is limited by its tank-mix partners.

⁹ See label for other crops.

For more information: Call **AgSolutions** Customer Care at 1-877-371-BASF (2273) or visit **agsolutions.ca**.

Always read and follow label directions.
