

Introducing Voraxor pre-seed herbicide.

# START WITH A CLEAN SLATE.

We've made the best burndown even more effective. Voraxor® wipes out tough weeds in a pre-seed burndown in peas, lentils, soybeans and corn. And it keeps on working with residual weed control in peas, soybeans and corn.

- High performance, broad-spectrum burndown
- More consistent residual activity on tough weeds like volunteer canola, cleavers, kochia and wild mustard
- Contains the trusted efficacy of Kixor® and the new innovative active ingredient Tirexor®
- Also registered for pre-seed use before wheat and barley

**Voraxor**®

Powered by Tirexor® Herbicide

**BASF**

We create chemistry

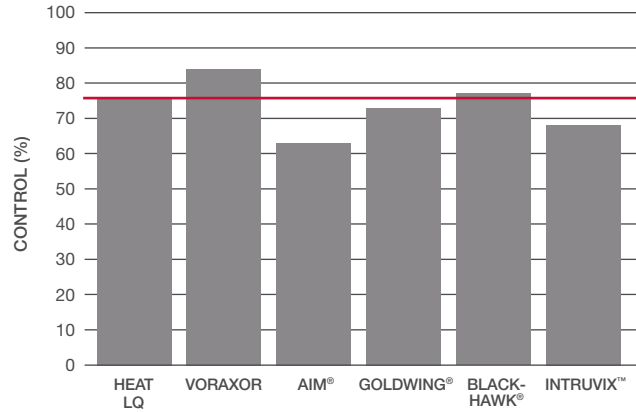

# Clean up weeds and the competition with confidence.

## Compare the performance.

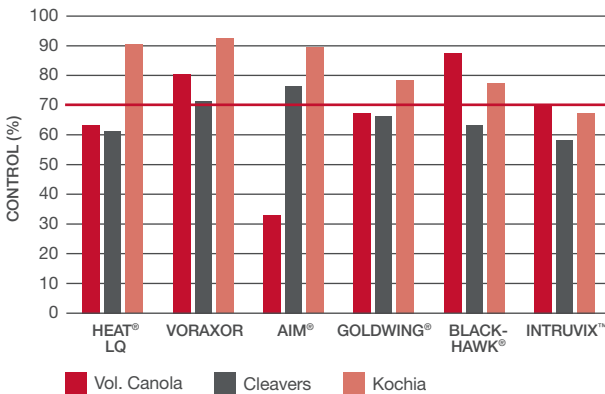

Weed control at 14-21 days after treatment. Glyphosate was not included in this trial. Source: BASF Small Plot Trials, Saskatoon, 2020

## Better broadleaf weed control.

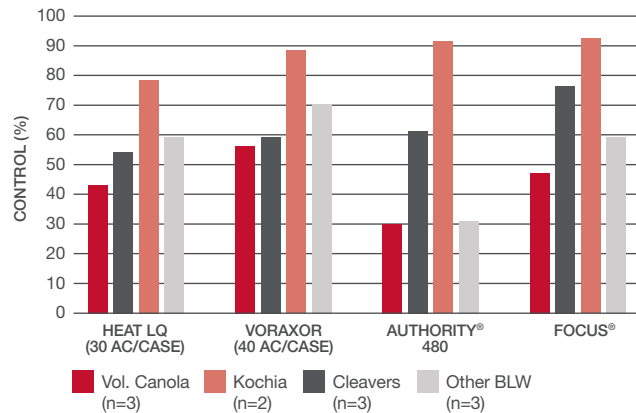

Annual broadleaf activity at 28-36 days after treatment on redroot pigweed, volunteer canola, lamb's quarters, wild mustard, cleavers, kochia and wild buckwheat. Source: BASF Small Plot Trials, Western Canada, 2020, n=22

## Raise the bar on burndown in pulses.

Burndown activity at 28-36 days after treatment. Glyphosate was not included in this trial. Source: BASF Small Plot Trials, Western Canada, 2020, n=10

## Improved residual spectrum.

Residual activity at 21-35 days after treatment. Source: BASF Small Plot Trials, Western Canada, 2020
