

2023 InVigor Hybrid Canola Support Programs

At BASF, we understand farming conditions can be unpredictable and want to help you protect your investment in InVigor® hybrid canola by offering the following support programs for 2023.

InVigor Commitment Program

If you have any concerns with flea beetle or cutworm damage in your InVigor hybrid canola that was treated with Helix® Vibrance® and BUTEO® start or Lumiderm™, you may be eligible for support. Should flea beetle or cutworm damage be observed, you may be eligible to qualify for support for an application of a foliar insecticide on the impacted acres. Please see further details on page two.

2023 BASF InVigor Ag Product Assurance

We stand behind our brands – if you have any issues using a product, we want to know so we can work together to resolve them. Depending on the nature of the inquiry, AgSolutions® Customer Care may be able to resolve your inquiry over the phone.
